MODEL M20 PLUS

Twenty Five Amp PWM Solar Charge Controller.

The M20 + Solar Charge Controller is designed for RV's and small cabin solar installations. Features include 12 and 24 volt operation, digital battery volt and charge amp meter, easy to read four LED battery gauge. An auxiliary battery trickle charger to keep engine or generator batteries fully charged. Over sized # 2 wire connectors. Battery temperature sensor is included. Reverse night flow Schotkey diode. PWM float voltage control. Made in USA.

Standard Features:

- Ideal for RV's and Cabins
- 12 and 24 volt operation
- PWM control
- Easy installation
- Five year warranty
- Over sized wire connectors
- Digital volt and amp meter
- 25 Amp charge current
- LED battery gauge
- Heavy duty industrial design
- Auxiliary battery charger included
- Battery temperature sensor standard
