

BZ PRODUCTS, INC. MODEL M25

Twenty Five Amp 12 and 24 Volt PWM Solar Charge Controller with Remote Display.

The M25 Solar Charge Controller was designed specifically for RV and small cabin solar installations. A remote meter may be installed up to 25' from the control unit allowing for greater flexibility in system layout. Additional features include 12 and 24 volt operation, Digital battery volt and charge amp meter, Easy to read four LED battery gauge. An auxiliary battery trickle charger to keep engine or generator batteries fully charged. Over sized # 2 wire connectors. Battery temperature sensor. Reverse night flow diode. Shunt PWM float voltage control. Made in USA.

Standard Features:

- Ideal for RV's and Cabins
- 12 and 24 Volt Operation
- PWM Float Control
- Easy Installation
- Five Year Warranty
- Over Sized wire connectors
- Remote Digital Display
- 25 Amp Charge Current
- LED Battery gauge
- Flush Mount Display
- Auxiliary Battery Charger
- Battery Temperature Sensor Standard
